

Terrain Analysis Package (TAP)
Evaluation Coverage Study

This radio path profile is prepared for the sole purpose of assisting you in evaluating SoftWright LLC's Terrain Analysis Package (TAP) software for a particular system. The results of the path profile are the property of SoftWright LLC. You may use the path profile only for the purpose of determining the suitability of the TAP software for your application. Using the results for any other purpose or providing the results to any other person other than those within your company who are a part of the evaluation is not permitted.

The computed results are prepared using the assumptions listed below and the facility technical specifications that you provide for the study. The actual radio coverage will be different under other conditions.

SoftWright LLC does not provide consulting services. This evaluation study is not intended for use in making decisions about the suitability of any radio system for providing service to a particular area. The results of this evaluation study provide information based on general parameters about the facilities, equipment and conditions involved. Actual specific conditions that affect the radio coverage can and should be adjusted for more precise modeling when you are using your licensed copy of the TAP software, but are not necessarily included in this evaluation study:

Filling out this form and requesting an evaluation study indicates that you have read and understood and agree to these conditions.

The profile will be computed for a single path from the base station to a remote station.

Please complete the information on the second page of this form and fax the results to SoftWright LLC at:

(303) 265-9399

You can also fill out the information in this text file and email to sales@softwright.com

BASE STATION

=====

Description _____

Latitude _____

Longitude _____

Datum

- * WGS-84
- * NAD-83
- * NAD-27
- * Other
- * Unknown

Transmitter

=====

Frequency (MHz) _____

Antenna (assuming omni-directional)

=====

Center of radiation (AGL) _____ (feet or meters?)

REMOTE STATION

=====

Description _____

Latitude _____

Longitude _____

Datum

- * WGS-84
- * NAD-83
- * NAD-27
- * Other
- * Unknown

Antenna (assuming omni-directional)

=====

Center of radiation (AGL) _____ (feet or meters?)
